BINNY SCHRIGER

SOFTWARE ENGINEER

PROFILE

Motivated Computer Science graduate (**GPA 96**) with hands-on experience in DevOps, automation, and full-stack monitoring systems. Passionate about building reliable, scalable infrastructure and solving real-world reliability challenges through code, observability, and system design. Eager to contribute to high-availability environments, support CI/CD pipelines, and grow as a Site Reliability Engineer.

PROJECTS

InterviewTracker - Website

Interview Management System

- Built a full-stack web app using **Python (Django)** and **PostgreSQL** to track and store users interview experiences.
- Implemented backend logic to analyze and score interviews, based on multiple parameters, with dynamic data visualization using **Chart.js** and **JavaScript**.

PlanItGo - Repo

Travel Planning App

- Developed a feature-rich travel planner in **Kotlin** using Android Studio, following MVVM architecture for clean code separation and scalability.
- Integrated multiple REST APIs via **Retrofit**, including Google Places, attraction details, and AI-based translation services.

CPU-Monitor- Repo

CPU monitoring system

- A Full Stack monitoring system for visualizing real-time **AWS** EC2 CPU usage, featuring an interactive **Angular** frontend, a robust **Spring Boot** backend with **Java** , and full **Docker** packaging for easy deployment.

DevOps CI/CD Pipeline - Repo

CI/CD for JSP App

- Built a CI/CD pipeline using **Jenkins**, **Tomcat**, **Selenium** IDE, and **Gatling**.
- Enabled full automation from build to deployment, including performance and functional testing.

TinyURL - Repo

Backend URL Shortening System

- Developed a backend service using **Spring Boot**, integrated with **Cassandra**, **MongoDB**, and **Redis** for scalable data handling.
- Built **RESTful APIs** with **Swagger**, and deployed via **Docker** for local and cloud use.

EXPERIENCE

Technical Support Associate , Wolt

2023- 2024

- Contributed to customer success by resolving user issues and identifying recurring technical problems.
- Collaborated with dev and ops teams to validate software functionality and resolve system issues.
