SKILLS

- Python
- Java
- C#
- C
- Linux/Bash
- TypeScript
- MySQL
- Docker
- CI/CD
- Selenium
- Pytest
- Postman
- Spring Boot
- Django
- AI / GenAI Tools
- Node.js
- React
- AWS
- PostgreSQL
- Redis
- MongoDB
- Swagger
- Kafka
- Elasticsearch

EDUCATION

B.Sc. Student in computer science at Hit , GPA of 96.

MILITARY

Combat Engineer, 2016 - 2018
Special Unit soldier in Combat Engineer forces.

LANGUAGES

- English (Mother tongue)
- Hebrew(Native)

BINNY SCHRIGER

SOFTWARE ENGINEER

PROFILE

Software Developer and Computer Science graduate (**B.Sc. , GPA 96**) with a strong drive for software engineering. Skilled in designing and delivering robust software systems with attention to scalability, architecture, and clean code principles. I'm a fast learner with a diverse technical skillset, always eager to take on real-world challenges and build impactful, reliable systems.

EXPERIENCE

- **Technical Support Engineer(Enterprise Systems) - Matrix** 2025- present
 - Provide advanced technical support for a complex hospital-scale system used by physicians, nurses, and researchers, including onboarding and hands-on guidance for sophisticated workflows. Work closely with implementers and developers to monitor, troubleshoot, reproduce, and resolve technical incidents end-to-end, documenting clear steps to reproduce and ensuring reliable operations under high-pressure, multi-tasking environments.
- **Technical Support Engineer - Wolt** 2023- 2024
 - Tier 1–3 Support: Troubleshot complex incidents across backend services by scanning logs, monitoring dashboards, and validating end-to-end flows. Worked with Dev/Ops to reproduce issues, prioritize fixes, and prevent regressions in production.

PROJECTS

- **WebCrawler - Repo**
FullStack website Scraper
 - Engineered a scalable webcrawler in **Spring Boot** using **Java**, implementing BFS traversal, **Redis**-based state management, and **Kafka** coordination to download and package entire websites into ZIP archives. Designed and implemented a clean, modern **React + TypeScript** UI with real-time progress visualization and full **Dockerized** deployment.
- **PlanItGo - Repo**
Travel Planning App
 - Developed a feature-rich travel planner in **Kotlin** using **Android Studio**, following **MVVM** architecture with a strong focus on UX and real-world usability. Integrated multiple **REST APIs** via **Retrofit**, including Google Places, attraction details, and **AI-based** translation services.
- **CPU-Monitor - Repo**
CPU monitoring system
 - A monitoring system for visualizing real-time **AWS** EC2 CPU usage, featuring an interactive **Angular** frontend, a robust **Spring Boot** backend with **Java** , and full **Docker** packaging for easy deployment.
- **InterviewTracker - Repo**
FullStack Interview Management System
 - Built a web app using **Python (Django)** and **PostgreSQL** to track and store users interview experiences. Implemented backend logic to analyze and score interviews, based on multiple parameters, with dynamic data visualization using **Chart.js** and **JavaScript**.
- **TinyURL - Repo**
Backend URL Shortening System
 - Developed a backend service using **Spring Boot**, integrated with **Cassandra**, **MongoDB**, and **Redis** for scalable data handling. Built **RESTful APIs** with **Swagger**, and deployed via **Docker** for local and cloud use.
