Motivated and highly skilled Computer Science graduate with strong hands-on experience in backend development and automation projects. Passionate about building robust, scalable systems and solving real-world challenges through clean and efficient code. Actively seeking an entry-level opportunity in backend development where I can contribute from day one and continue to grow as a developer.

Projects

InterviewTracker - Interview Management System – [Website](#)

- Developed a comprehensive **full stack web** application primarily using **Python** and **Django**, enabling users to input and store their interview experiences in a **PostgreSQL** database.
- The application analyzes interview grades by processing various parameters and calculating scores, which are then visually represented in interactive charts using **Chart.js** and **JavaScript**. Users can view their interview data according to date and grade.
- The front-end is elegantly styled with **HTML**, **CSS**, and **Bootstrap**, ensuring a responsive and user-friendly interface.
- This project aims to support and motivate job seekers by providing a structured platform to track and analyze their interview progress, ultimately easing the job hunting process.

PlantGo - Travel Planning App – [Repo/Demo](#)

- Developed a smart travel planning app using **Kotlin** in **Android Studio**, following the **MVVM** architecture.
- Integrated multiple **APIs** using **Retrofit**, including location search, attraction details, and real-time translations with **AI**.
- Implemented Coroutines for efficient asynchronous operations and **LiveData** for real-time data updates, using **Google Places API**.
- Features include trip planning, attraction discovery, custom destinations, and seamless navigation with a bottom navigation bar.

Professional Experience

Technical Support Associate: Wolt, Aug 2023 – Oct 2024

- Collaborated with dev and ops teams to validate software functionality and resolve system issues.
- Improved internal OS workflows and automation tools for smoother operations.
- Contributed to customer success by resolving user issues and identifying recurring technical problems.

Technical Skills

- Programming Languages:** Python, Linux, C, C++, C#, Kotlin, Java.
- Web Development:** React, TypeScript, JavaScript, HTML, CSS, JSON.
- Backend & Frameworks:** FastAPI, Django, Node.js (Express), .NET Core.
- Database Management:** MongoDB, PostgreSQL, MySQL, SQLite.
- DevOps & Tools:** Docker, GitHub Actions, Linux, VS Code, IntelliJ, Android Studio.
- APIs & Integration:** RESTful API Design, Postman, Swagger, OAuth2.
- Testing & Automation:** PyTest, Unit Testing, Jenkins, CI/CD Pipelines, Git.
- Data Analysis:** Pandas, NumPy, Matplotlib, SQL Queries.

Education

B.Sc. in computer science, Holon Institute of Technology(HIT).

- GPA of 95.5**, Part of the dean's honors list.
- Relevant coursework: Algorithms, Data Structures, Operating Systems, Communication networks.

Military – Reserve Duty

Combat Engineer, Mar 2016 – Nov 2018 (Active Reserve 2023–2025)

- 200+ days of reserve duty, involved in high-pressure missions. Led team logistics and training.
- Special Unit soldier in Combat Engineer forces.
- Head of the team in managing exercise schedule and workouts, and recruiting new soldiers to the unit.

Languages

- English** - Native (American).
- Hebrew** - Native.

Volunteering - Impact Associate

- Provide emotional and practical support to older individuals experiencing loneliness and disabilities.
- Contribute and support community-driven initiatives aimed at social inclusion.
