Final-year Computer Science student with hands-on experience backend, and full-stack development. Passionate about building efficient software and solving real-world problems. Currently seeking an entry-level role in backend, automation, or full-stack development to apply my technical skills and deliver value from day one.

Education

B.Sc. in computer science, Holon Institute of Technology(HIT).

- **GPA of 95.5**, Part of the dean's honors list.
- Relevant coursework: Algorithms, Data Structures, Operating Systems, Communication networks.

Projects

InterviewTracker - Interview Management System

- Developed a comprehensive **full stack web** application primarily using **Python** and **Django**, enabling users to input and store their interview experiences in a **PostgreSQL** database.
- The application analyzes interview grades by processing various parameters and calculating scores, which are then visually represented in interactive charts using **Chart.js** and **JavaScript**. Users can view their interview data according to date and grade.
- The front-end is elegantly styled with **HTML**, **CSS**, and **Bootstrap**, ensuring a responsive and user-friendly interface.
- This project aims to support and motivate job seekers by providing a structured platform to track and analyze their interview progress, ultimately easing the job hunting process.

PlanItGo - Travel Planning App

- Developed a smart travel planning app using **Kotlin** in **Android Studio**, following the **MVVM** architecture.
- Integrated multiple **APIs** using **Retrofit**, including location search, attraction details, and real-time translations with **AI**.
- Implemented Coroutines for efficient asynchronous operations and **LiveData** for real-time data updates, using **Google Places API**.
- Features include trip planning, attraction discovery, custom destinations, and seamless navigation with a bottom navigation bar.

Professional Experience

Technical Support Associate: Wolt, Aug 2023 – Oct 2024

- Collaborated with dev and ops teams to validate software functionality and resolve system issues.
- Improved internal OS workflows and automation tools for smoother operations.
- Contributed to customer success by resolving user issues and identifying recurring technical problems.

Technical Skills

- **Programming Languages**: Python, Linux, C, C++, C#, Kotlin, Java.
- **Web Development**: React, TypeScript, JavaScript, HTML, CSS, JSON.
- **Frameworks**: Nodejs, Django, .Net.
- **Database Management**: MongoDB, PostgreSQL, MySQL, SQLite.
- **Data Analysis**: Pandas, NumPy, Matplotlib.
- **Test and documents**: Postman, Git, RESTful API, Jenkins.

Military – Reserve Duty

Combat Engineer, Mar 2016 – Nov 2018

- 200+ days of reserve duty (2023–2024), involved in high-pressure missions. Led team logistics and training.
- Special Unit soldier in Combat Engineer forces.
- Head of the team in managing exercise schedule and workouts, and recruiting new soldiers to the unit.

Languages

- **English** - Native (American).
- **Hebrew** - Native.

Volunteering - Impact Associate

- Provide emotional and practical support to older individual's experiencing loneliness and disabilities.
- Contribute and support community-driven initiatives aimed at social inclusion.
